In the Notice of Allowability mailed on July 11, 2005, the Examiner provided a section titled "Reasons for Allowance." See, Notice of Allowability at p. 2-3. Applicant contends that the wording of the Examiner's "Reasons for Allowance" may be subject to misinterpretation. Specifically, the "Reasons for Allowance" is written such that the limitation cited from claim 1 could be read into the other independent claims. Therefore, Applicant provides the following comment to make Applicant's understanding of the "Reasons for Allowance" of record in this application.

Applicant contends that, in the "Reasons for Allowance," the Examiner provided an example of language from claim 1 only to distinguish claim 1 from the cited art. The Examiner did not intend to imply that this same language is part of each and every independent claim. Applicant further contends that the Examiner relied on language in each of the independent claims to support their individual patentability. In support of this position, Applicant points to the Examiner's statement that "these limitations, in conjunction with the other limitations of the independent claims, are not specifically disclosed or remotely suggested in the prior art of record." Thus, the Examiner appears to be using the quoted language to support the reason for allowing claim 1 and indicating that the other independent claims are allowable based on their own limitations.
